Comments: I moved here by accident and stayed on purpose. This state is more beautiful than any state I have lived in. The appeal of this state has a lot to do with how much Untouched nature there is here. The proposal to "fix up" and make it "lux" is totally missing the point. AND it will be making our residents foot the bill for something most of them won't be able to afford.

We the people of the United States of America are sick and tired of stuff like this; give a way to businesses and the 2% from the money we pay in taxes while y'all reduce social security programs and social services that would help the 99% IF they were FUNDED Properly! Don't say "we can't afford to". We can.

The problem here is more a question of who do you think the government should be helping;

a: the 2%, super rich, and gigantic businesses.

OR,

b: our military members, their families, and our vets; our disabled and their families, our working individuals and their families, our abused and neglected people, our students, our seniors, our small farmers/ranchers/businesses, our children, etc.

We DON'T want more of the "help the rich trickle down theory." Surprise! It hasn't happened since Republicans got it going when Regan promoted it. It only helps the rich.

We, the 98%, KNOW it Only helps the people who don't actually need that money.

Do Not give them this, they will throw a worse tantrum.
