Title:

Comments: This project is an example of economic exploitation of leased public lands. This will not only compromise the integrity of Holland Lake and the landscape, it will also change the social integrity of a delicate ecosystem. Due to the very nature of this project and the direct and indirect environmental impacts, this would not qualify for a CE and thus an EA/EIS is required. I urge the USFS to do their due diligence in analyzing this project through the gamut of environmental review that it not only deserves, but requires.
