Comments: The construction of this lodge proposal would be the first step on the slippery slope that will lead to eventual demise of our wilderness areas. As we plan to accommodate more people, we will need to build more infrastructure, build more trail heads, build more stores, expand the highways, expand vrbo, price out the locals, put in an arcade for kids visiting. Build more houses. Keep the bears out of the area we just took from them. You see where I'm going with this? This will also deminish the natural solitude that people come to this area seeking. Please go re read your Edward Abbey books and do some deep reflection in nature before ruling on this project.

Thank you deeply for taking this matter seriously

- concerned outdoorsman
