Comments: As long time visitors to Holland Lake and the magnificent Bob Marshall Wilderness beyond we are going on record in **STRONG OPPOSITION** to the proposal by a Utah company to expand and grossly overdevelop the relatively small 15 acre national forest permit area where the Holland Lake Lodge is situated. This ill-conceived project will adversely change the semi-primitive character of Holland Lake, the historic lodge and surrounding wild lands. Holland Lake is a major gateway into the Bob which will be severely impacted by the many new structures proposed. The project cannot be viewed in a vacuum. Rather it must be assessed with the broader context of its adverse impacts on the adjacent Bob Marshall Wilderness ecosystem.

Please say **NO** to the Holland Lake Lodge expansion. Limit the project to necessary repairs and upgrades to the lodge itself.

Thank you for your stewardship of OUR national forest.

Sincerely,

Bill & Polly Cunningham, Choteau, MT
