Comments: The natural beauty of holland lake and Mt should be enough to stop this project. Dramatically destroying trees and the land around the lake will decrease local use and destroy the natural beauty of the land. So much change has been killing the landscape and the love of locals and those moving here who truly just love the beauty of the land. Stop with destroying tree and trying to urbanize the country land. Having local access is more important than another luxury lodge that only people with thousands of dollars can stay in. Keep Mt Rural.  
~ A born and raised local
