Comments: 10/28/22 The Bozeman Daily Chronicle's editorial page featuring Bill Lombardi's comments about the proposed expansion of public land for an outdoor adventure/ski resort needs to be fully vetted to ensure the connectivity of wildlife corridors and adverse effects on Holland Lake and traffic issues on the narrow roads in the area are fully addressed. We need more wilderness, not more development of our scarce wild lands. Please do not continue to rape our natural world for profits. Our wildlife deserve places to live too. The book "Screwnomics: How our Economy Works Against Women and Real Ways to Make Lasting Change "by Rickey Gard Diamond explains how the benefits of our wild lands are discounted inappropriately for the benefit of wealthy white men!!
