Comments: I total support the expansion and renovation submitted by the owner and developers of this Holland lake resort project presented to the F.S. The current owner over the years has a proven record and commitment and late in life wants to see the badly needed upgrade to accommodate the recreational use of this area. I am a native Montana guy from Missoula and very lucky that my parents built a cabin on Lindbergh lake 60 years ago. my daughter work at Holland Lake Lodge with other kids from the lake during the summer months: all said outstanding place to work! This project is way behind on being updated to the standards to support us baby boomers to enjoy an upgraded resort. I do not see how this upgrade could or would degrade the area. It will only provide a much better structured use of the area. (parking, staff housing access the lake) all the lakes in the valley are public and people should be allowed good access.

thank you for listening
