Title:

Comments: Holland Lake and the trail to the falls are a precious natural space where human solitude and habitat for many fish and animals are designated on public lands. The Forest Service has a duty to protect this area from further development at the expense of this special place. Ample access to recreation and accommodations already exists in this area with day use sites, camping and the existing lodge. Further construction and expanded properties for guests and staff housing will degrade biodiversity and the ecosystem of Holland Lake and its surround forest. Please do not develop it further.
