Comments: Expansion of a lodge on Holland lake would be detrimental to the environment that surrounds it. We should be focused on preserving the beautiful, clean lake, while keeping the area natural for animals.

Construction brings in heavy equipment, machinery and loud noises that can disturb the wild life. On top of that when have we ever seen a clean construction site? The answer is no. What a tragedy it would be to see the lake and area littered with trash from construction workers and their materials

Holland lake does not and should not be commercialized . Holland lake does not need an updated lodge.

Holland lake is a fun recreational area where people can camp, hike, and swim. It does not need a resort, nor the noise and traffic that a resort brings. As a local Montanan I am firmly against any type of expansion and plead with the forest service that they take a stand and reject this expansion as it will ruin a place we all love.
