Comments: Allowing the Holland Lake Lodge to be greatly commercialized would be a huge mistake.

Commercializing historical/remote areas removes the charm of Montana but more importantly greatly impacts our natural habitat and wildlife. Look at what has happened to Glacier National Park in the past 2 years with the large influx of people. People completely destroying natural habitats and disregarding preserving nature or wildlife. So what needs to be asked is why would we allow someone to make a large profit and destroy another remote area. Keep Montana remote.
