Title:

Comments: I have three items to comment on:

1. The human impact proposed is too large for the fragile nature of Holland Lake and surrounding natural features. The number of units needs to be reduced.
2. The no build setback of 20 feet is inadequate to protect the natural features of Holland Lake, particularly song birds seeking habitat along the lake. The setback should be 100 feet to protect the functioning habitat along the Lake.
3. Restrictions on water recreation need to be clearly formulated and stated to maintain the naturalness of Holland Lake, which is a fragile lake system that could be significantly degraded by excessive human impacts.
