Comments: Montana is a sacred, special, beautiful place that I have been lucky enough to grow up in and call my home. Holland lake is a place of early childhood memories and home to a forest full of wildlife. We know by now that the earth is something we need to protect and cherish, why should holland be an exception? Don't let money hungry out of state developers extract what money they can out of the land and then leave it destroyed. I can speak for most Montanans when I say SAVE HOLLAND LAKE. Don't let another one of our precious natural scenic areas get destroyed. For me, for Montanans, but most of all for the delicate ecosystem and diverse wildlife that live in the area.
