Comments: To whom it may concern,

Please do not build a large commercial property on Holland Lake. That area is beautiful in a remote area. The falls are for local residents to hike, the lake is not big enough to support a hotel full of recreational use. People won't want to stay there as the water is cold most of the season. Please keep the land free of large commercial properties. Residents who reside there chose that area for the remoteness and the lack of large commercial properties. We share all of our lands with tourists and those who are wanting to control and change our land to be like those of large cities.

Thank you!
