Comments: I have lived in the Swan Valley for 23 years and am an avid hiker, cross country skier and trail runner. When I first moved to Montana I lived in Condon and actually worked part time at the Holland Lake lodge for a few years. I agree that the current lodge and cabins are in need of updating and renovation, but I disagree with the scope of the project that POWDR is proposing. Holland Lake is a small lake that already gets enormous use in the summer. Allowing the current proposed project to proceed would greatly impact wildlife, visual esthetics and possibly the water quality of the lake. This is such a special place for all of us locals and of course we do not own it but certainly feel a strong commitment to preserving it. I frequently hike up to the Holland lookout, upper Holland lake, Foothills trail and more. I've seen several black bears, goats (up at Rumble lakes) and of course deer and grouse. This area does not need a large developed resort like the one being proposed. Scale it down some and listen to the community that cherishes this place.
