Title:

Comments: I am in opposition to the proposed Holland Lake Lodge expansion on public land just outside of the Bob Marshall Wilderness and recommended wilderness, which would negatively impact Wilderness, wildlife, and public use of national forest land that belongs to all of us.

* The impacts from this inappropriate development would be felt far beyond the immediate area, which is already facing increased development and recreation pressure. The commercialization of the area and the resulting hordes of people who could be here year-round threaten public lands surrounding the area, including the Bob Marshall Wilderness and recommended wilderness.

* The "Bob" is one of America's crown jewels of the Wilderness System, with high quality habitat for grizzly bears, lynx, wolverine, elk, and other native wildlife; more humans in the area would harm both wildlife that need secure habit and wilderness values such as solitude.

* The Wilderness may also be negatively impacted by more air traffic (both airplane and helicopter) via motorized sightseeing, heli-skiing or heli-hiking in the Missions and Swan Range, mountain biking and bike races, trail running, and other high-impact recreation facilitated by a large four-season resort at Holland Lake and expanded trailhead parking for access to the Wilderness.

* Please reject the proposed Holland Lake Lodge expansion and protect the Bob Marshall Wilderness and our other public lands near Holland Lake.

* The Forest Service should reject the proposal out-of-hand. The FS shouldn't be wasting taxpayer money or citizens' time responding to this inappropriate proposal. If the FS chooses to further consider the project, it should prepare an environmental impact statement that considers the full range of potential impacts at Holland Lake and the surrounding public lands, including the Bob Marshall Wilderness.
