Comments: I understand that highly impactful development of this pristine area is proposed. Including destruction of historic structures. Commercialization of the Holland lake area would eventually lead to decisions made for profits that ignore what's best for the environment or for Montana.

Please do not allow corporate America to destroy our Montana treasure. I'm from Louisiana. It's too late for our coastline, as corporate profits were taken over the years a little at time at the expense of our marshlands. We are working to mitigate the inexorable loss of our beautiful habitat that was once teeming with wildlife. It all started with short-sighted decisions being made. This has all the markings of just such a stepping off point. History says don't do it.
