Comments: I am writing because i am a native Montana who feels our public lands are for the public and not for private profiting. Holland lake is a great area because it is small and keeps the amount of traffic on the lake down. Expansion spells more traffic and noise. Holland lake is a place to get away from the explosion of out of staters who are destroying what Montana is loved for. This expansion will turn Holland lake into a resort for the rich. New owners can sugar coat this expansion all they want. Montanans need to see these sheep in wolves clothing for what it is....another chance to exploit and destroy another gem in Montana. If you don't fight back Montanas you have no reason to bitch when it is all destroyed by big corporate money. Looks to me like the forest service is now representing big out of state money instead of the people who they are suppose to represent THE PEOPLE OF MONTANA. I'm guessing the top representatives of the forest service are all out of staters! Lets just turn all of Montana into Colorado, California, Texas, Oregon, or Washington. Thanks to all of you for ruining our great state!
