Comments: I am against approval of the proposed large expansion of Holland Lake Lodge.

The proposed large expansion of Holland Lake Lodge will have significant and lasting negative impacts on the public lands around the Lodge.

The planned expansion would dramatically increase human use and accompanying infrastructure development (e.g. roads, water use, waste production and management) in this area.

The public lands around Holland Lake Lodge contain habitat for sensitive and endangered species such as grizzly bears (*Ursus arctos horribilis*), Canada lynx (*Lynx canadensis*), and wolverines (*Gulo gulo*). Such habitat in MT (and the United States of America) is becoming less and less available to these animals because of ever increasing human encroachment.

Holland Lake, and its surrounding environment are not an acceptable location for creating a heavily-used destination resort.
