Comments: I am strongly opposed to the expansion plans for Holland Lake Lodge. Increasing the lodge's capacity as proposed, from 63 to 173 overnight guests and staff and serving 3 times as many meals, will have a devastating impact on the surrounding wilderness. With that much foot traffic, you might as well forget about the loon that nests on a log just off the path to the waterfall, not to mention all of the other wildlife that will be displaced by considerably more human activity. This place is a gem and should be protected, not developed into an all-season resort. It will destroy the beauty, serenity and peacefulness that can still be found there. I do understand that the lodge could use some TLC. Please only approve renovating/repairing the existing structures, not expanding them. Thank you.
