Comments: To whom it may concern:

I am opposed to this proposed development. I feel that this proposed huge expansion of what is sure to be a high priced hotel is not in character for this location. Nor is this expansion in the best interest of the true owners of this land - the American people. The master development plan talks about "restoration", "preservation", and how this is a "soulful place", but adding tens of thousands of square-feet of new development does not engender any of those qualities.

Thank you
