Comments: This is just a money maker for a private company geared more towards the wealthy rather than the average tax paying citizen. This is a quiet, historic place that is being exploited for the wealth of a rich company. I have been going there for 40 plus years because it is peaceful and not overrun. Does the Forest Service really need another BIG Sky Resort or Big Mountain. Can't we just leave beautiful places undeveloped? This will adversely effect local wildlife, water fowl, and air quality as well as the average Montanan and US citizen who enjoy wild, quiet places like this.

Why ruin this place so a rich developer can line his pockets?! Who in the Forest Service/Government is getting kick backs in the form of Election Contributions or monetary favors? The public knows this is not the right thing to do and you are supposed to work for the public!
