First name: Mike

Last name: Winn

Organization:

Title:

Comments: Our family are long-term homeowners at the base of Copper Mountain.

1- we are supportive of the replacement of the four person timberline lift with a new six person chair.

2- We are also supportive of increasing the mountain bike trails on the mountain. Copper Mountain is very very far behind Keystone Breckenridge Winter Park Vail and others in terms of developing summer mountain bike trails. We want to ensure that they develop downhill trails that are flow trails with few if any roots or rocks. steep down hills are fine, we just don't want anything that's technically challenging. We would love it if they would add an "uphill trail only " for those of us that are mountain bike climbers but that's probably not in the cards. We never ride the lift up with our bikes we always ride to the top.
