Comments: I've lived in MT since 1949. Growing up here, we spent a lot of our time during high school hiking and camping in the Mission Mtn Wilderness. The Swan valley is surrounded the Mission Mtn wilderness on 1 side and the Bob Marshal Wilderness on the other side. It's as pristine a valley as any you will find in MT. Letting POWDR expand the Holland Lake lodge and surrounding area would totally destroy this beautiful valley. With all the increased traffic and the hordes of visitors during the whole year, the wildlife and endangered bears would undoutably be affected. I am very much opposed to letting them get the permit to do this. Let's make a decision in favor of the wildlife for once. Thank you.
