Title:

Comments: Holland Lake is a very special natural place in Montana and the Seeley Swan Valley. That is mostly located on Lolo National Forest Service land that has been use as a public recreational site of well over 100 years! It should remain public! It should never be sold of to land developers or real estate developers! It should be protected public property for all Montanans to enjoy and remain for public recreation. Please do not allow the sale and private development of this wonderful part of public lands!

Sincerely, a concerned Montanan!

Charles Buskirk
