Comments: Dear US Forest Service Representatives,

You are chargeed with taking care of public land for future generations. This project would remove a gem of public land out of Montana's hands and put it into the hands of the wealthy. I am against all such projects, as I am part of the public that would lose access to our public lands. This is blatant corporate development and land loss for the public. Please defend our public lands, and resist becoming servants to private entereprises. Thank you.

Sincerely,

Willa Fouts
