Comments: The proposed development of Holland Lake will have a negative impact on the area. Instead of seasonal use, the proposed expansion will be year around use by hundreds more people. Montanans like me won't be able to afford access to the pristine beauty Holland Lake provides. We will be priced out of the ballpark. What impact will this have on wildlife? More of the same pushback for the abundant wildlife in the area. I am opposed to POWDR's proposed plan to develop this area.
