Comments: I am writing to state that I oppose the Holland Lake expansion project #61746.

I do understand that maintenance and some improvements are warranted but this proposed expansion will impose a substantial negative impact on what is currently a relatively quiet and peaceful lake. This is not an attempt to preserve and protect the historical lodge, it is more akin to urban renewal for the sake of monetary gain.

Has a full and complete environmental impact study been performed? There are already septic restrictions in place on this lake, why is an exemption for this project so casually being offered here? The impacts are significant. Who will be funding the increased costs of road maintenance, EMS services, law enforcement and sanitation into perpetuity?

Please do not allow this project to proceed, it will set an ugly precedent that Montana and the precious resources that make our state so special and unique are for sale to the highest bidder. please do not turn a blind eye to this project, make the right decision and stop this corporate development. Protect this treasure of a lake.

Our state and the Forest Service's integrity are not for sale.

Thank you for taking our comments into consideration before granting any approval for expansion.
