Title:

Comments: Some improvements and upgrades might be justified for the Holland Lake Lodge but the scale and gentrification proposed is of a world far away from rural Montana public natural resource access. The CE fast track seems to be a smokescreen to mask the level of major development proposed. it looks to me to be an attempt to foist another big money making Montana retreat for the wealthy class without regards to the impact on wildlife and the general Montana public. It needs to be scaled back and environmentally reviewed with proper public input. Thank you Vicky Bohlig
