Title:

Comments: I strongly object to the major development planned for the Holland Lake property. This development is planned for Public Land (land that belongs to us!), which should not be used for developers from Utah to come in and profit from. Not to mention, the harm that it will do to the wild animals that live on and near the lake, the increased traffic in the area, more people, and pollution. I understand the need for improvements to the resort, but this is above and beyond what is reasonable and prudent!
