Last name: Beck

Organization:

Title:

Comments: Holland Lake is a small lake that is getting more shallow every year. Adding the stress of the number of proposed structures, traffic and users to the environment will not bode well for the ecosystem. The added traffic and noise will eliminate the ability to enjoy this precious place for all, never mind the stress to the loons, osprey, eagles, beavers, deer, bears and fish. Please help us protect and sustain the current manageable level of human impact on Holland Lake - no expansion.

Thank you,

Katherine
