Title:

Comments: I am Gayle Crane and would like to express my objection to the proposed development plans for the Holland Lake Lodge in the Flathead National Forest near the Bob Marshall Wilderness. The buildings of this facility should be maintained and historically restored. However, the proximity to the wilderness area, the loss of trees, and the dramatic increase in site size are not environmentally appropriate developments for this exquisite, remote lake. I support an environmental impact statement and other appropriate studies, but object to enlarging the site for a larger public facility.
