Title:

Comments: I am a native Montanan and I live near Arlee. I have recreated at Holland Lake for many years. My father was a forest ranger for the USFS (Chugach, {{now part of the Tongass}} and Kootenai Districts). He he took his duties to protect public lands very seriously and taught me and my siblings the value of public lands. I oppose the proposed sale and changes to Holland Lake Lodge because I don't believe it is in the best interests of the public or the wildlife and habitat of the area. The grizzly, lynx, elk, deer, loons, bull trout and so many more beings along with the clean water, air and soil are what make this place special. We can't allow development of the Lodge for increased use and expect what we love to survive. If we do, that action will be part of selling Montana off to the highest bidder. The increased numbers of people and the infrastructure to support them in this project will the harm area and make it less accessible to every day Montanans. We need to protect Holland Lake for ALL not just SOME. Holland Lake is a precious resource that needs our holistic care not exploitation for money. Sincerely, Youpa Stein
