Comments: Against Holland Lake Lodge expansion. Currently this is a Forest Service Lease. Forest Service property is owned by the American public. Increasing units on this small lake will only contribute to increased pollution and wildlife habitat disruptions. Most Montanans would not be able to enjoy this pristine lake as we know it today. Allowing a large company to come in increase the unit amount add a restaurant would only allow most wealthy persons to enjoy it. In this area is also a trail head into the Bob Marshall Wilderness. Many Montanans that utilize this trailhead. Increase use by this companies guests is a fear many have. This would also impact the current trails lakes streams and wildlife. This proposed increase in Lodge size to to large for this area. Montana needs to remain Montana. Private lands have been purchased and companies put up large lodges. This is public land on a Forest Service lease that belongs to all of the people. It should not be developed and that is exactly what this company is proposing to do. Keep the current Lodge size for the current Forest Service Lease or remove the Lodge and do away with the lease Leave Montana Montana!
