Comments: Let's not forget, this is a business. For a business to be successful it must be able to turn a profit. I think everyone is in agreement the Holland Lake Lodge and facility is a piece of local history and no one wants to lose it. The Lodge is old and needs a lot of investment to survive. The proposal to expand and upgrade the facilities is a very expensive and a huge commitment to the owners. It must be able support such an investment by expanding it's ability produce income. I also believe the Forest Service wants it to be an example of what the public deserves and will make sure it is in the publics best interest. The residents of the Swan Valley would have something to be proud of and not have to make excuses for much needed upgrades and infrastructure for a year round enjoyment for the locals and visitors as well. I understand that people don't like change, but it's gonna happen, this is a chance to try and do it right. I fully support the proposal put forth.
