Comments: I oppose the expansion of Holland lake lodge. The fact that the public was kept out of the knowledge of this deal longer than they should have according to correct USFS process is wrong in the first place. This holland lake public land is cherished and already heavily used by Montanans as it should be. Turning this int to a large resort lodge will push out the local Montana people who care for and recreate on this land, and we know this by evidence of the overrun spaces in Montana by huge resort companies. The displacement of wildlife and negative to effects to the local ecology are a concern as well, and it doesn't look like there is due process being followed here to determine the environmental effects of a project like this. A thorough and complete EIS should absolutely be done if there are going to be human made changes to this beautiful land that we treasure.
