Comments: Hello,

I just wanted to voice my concerns about this project.

First

I don't have the expertise to say what kind of environmental impact this type of expansion would have on the environment but a formal study should be conducted to make that determination.

Our public wild spaces should remain wild and we can visit for a short time.

Second

This expansion does not benefit the public as a whole. A private corporation should not be able to lease and develop public land when it wants to book even single rooms for (at the current rates) \$300+ per night. This only benefits a tiny percentage of the population.

Those who visit this area want to visit because it is a quiet pristine and wild area. Having 100+ people staying at an over priced lodge will have a negative impact on the rest of the population.

Third

If there is ANY new construction, it should be set back far enough that the public doesn't have to look at it while enjoying the lake. They shouldn't have to feel like they are being looked down on by people in the lodge. The shore surrounding the lake should be accessible by everyone hiking around the lake or hanging out around any part of the shoreline.

The local neighbors in this area don't want this expansion. Regional Montanans don't want a private enterprise to build an elitist resort on public lands.

The expansion should not be approved.

Thank you,

Ty B
