Comments: Hello,

This project has been a hot topic for a while now and I wanted to add my opinion. My first thought is that the plans for this project are way too big for this small 2 mile lake. How will this expansion affect the environment? A formal study needs to be required. I also don't believe this project will benefit anyone other than the wealthy. We've commercialized every large lake we can, let's leave the small ones (that don't really support large corporate visions) alone so the majority can enjoy them respectfully. Overall, this project should not be approved and goes against everything Montana stands for.

Thank you,
Joline Belnap
