Comments: I am truly appalled at the decision to allow the expansion of Holland Lake Lodge in the relatively pristine environs of the current lodge. Holland Lake is a treasure, and Montanans are losing way too many such treasures to wealthy out of state developers. Big Sky is a great example of development run amok. I oppose the expansion because I value the serene beauty of Holland lake, and the relatively unobtrusive nature of the existing development. I have not been able to find the environmental impact statement (EIS) related to this project. The FS and DEQ must have gone on record approving of this expansion based on the EIS or it would have been curtailed by now. Of course, under United States environmental law, the EIS is a document required by the 1969 National Environmental Policy Act (NEPA) for certain actions "significantly affecting the quality of the human environment". I would like to read a copy of that document.
