First name: David

Last name: Delsordo

Organization:

Title:

Comments: I have several concerns about the proposed project:

the pristine quality of the waters of Holland Lake and its connected streams must be protected during every phase of the management and development and maintenance of project.

Holland Lake Lodge and its associated developed features should remain accessible to families and the local community.

The solitude of the features and environment should be protected.

The scale and scope of the proposed activities warrant analysis in at least an Environmental Assessment. The Cumulative Effects of the proposed activities must be identified and examined fully.

Please keep me posted of the progress of the analysis and progress of the project. please keep me posted on opportunities to comment.

Thank you for your time and attention to my concerns.
