Comments: I strongly oppose this development project. Holland Lake is one of MT gems, and needs to be preserved 100%. My wife and I have been there on numerous occasions and it is all ready overused and heavily exploited. On any given summer day, all you hear is jet skis and motor boats. larger developments will only add to the congestion, and destruction of this beautiful habitat. MT state and the forest service need to protect this area, not promote and enable development. The best resolution is to expand the wilderness area to the west, and include this area to protect it for future generations. Many development proposals upfront have many promises to protect the area, however these usually erode during development and use and the next thing you know, the area is overcrowded, ditches full of trash, and wildlife nonexistant. REJECT THIS PROPOSAL AND DO NOT ALTER OR ALLOW ANY CHANGES IN ZONING OR EXISTING LAWS.
