Comments: The plan to expand the Holland Lake Lodge on Flathead National Forest should include detailed analysis of its impacts. The strategy to propose this project as a Categorical Exclusion(CE) is inappropriate. A plan that proposes to double the lodge occupancy and the number of outbuildings requires a full review.

I have camped at the Holland Lake Campground and appreciated the environment and undeveloped character of the locale.

I can only wonder why a significant action is considered to have insignificant impact on the environment. A full review should be completed before any decision is made. I support strongly the response by Senator Jon Tester.
