Comments: Here are a list of concerns and suggestions for the Holland LK Expansion Project:

1. Please extend the comment period
2. Please make sure there is an environmental impact statement and/or environmental assessment done.
3. Consider all of the endangered species affected by the expansion such as: Canadian Lynx, grizzly bear, wolverine, & bull trout. And the affects on the nesting loons nearby.
4. Think about how much the emergency services - Fire, QRU(ambulance), and Search & Rescue will be taxed, since almost all of them are volunteers.
5. The change of dynamics of the Swan Valley will totally be changed and the wildlife will suffer.
6. What type of Forest Plan is there in place already and how will it be affected.
7. Consider the disturbance on the water quality, the soil, the traffic on the road, etc.
