Comments: Hi, I am new to Montana but not new to the government destroying beautiful places. There is no need for another ski resort in the area and if there is one then how will we uphold the standard of "fair and equitable use," which is the purpose of the Forest Service. We are asking for the ability to choose to enter this nature space unimpeded. We are asking to enter this space without having to pay out the wazoo to be there. We have enough pay to play in our natural resources, please don't make this one of them.
