Comments: I am writing to oppose the proposed development on Holland Lake. During the pandemic, Holland was unfortunately already discovered and is overrun with too many people and too much pressure. The setting and the natural resources can't withstand more. Please consider the experience so many people escape to Holland Lake for and ask yourselves why would anyone, except those who care only about making money, be supportive of such a dramatic change?

Montana is changing before our eyes and we can't keep losing what makes our State so special. Please listen to your constituents versus out of state developers who don't share our values.
