Comments: My family has been going to Holland lake for 17 years. It is one of our favorite camping places. The beauty of this place lies in the remoteness and the simplicity. To add more to the lodge and bring in so many more people would ruin this simple beauty. It would cause overcrowding on this beautiful lake that feels like, at times, it has already reached its maximum occupancy. The traffic on Hwy 83 is already at a dangerous level. Without improvement to the entire hwy, adding so many more people to the already dangerous traffic would be catastrophic.

The amazing hike to the falls at the end of the lake is already heavily used. With addition of so many more people, this trail would become abused, or worse, closed because of overuse.

I understand a need to improve already existing facilities. But adding so many more units would just commercialize a very special place and Holland lake would become just like everywhere else, overcrowded, expensive and over used.
