Comments: Holland Lake is one of Montana's premier historic gems. It should not be exploited for the gain of one entity. When the Forest Service granted temporary use and guardianship to the current lease holder, it was done in the spirit of awarding the lease holder the responsibility of protecting the beauty and historic nature of the lake and lodge. If he can not do this the lease should be rescinded.

We can not keep losing these historic sites. The Forest Service needs to "buck up" and do what is right for the land not the "pocket".
