Comments: As a resident of Montana I would like to state that my wish would be that we protect our public lands and not allow these precious lands to be developed and destroyed. Holland Lake should be protected for the future so that our citizens can enjoy the beauty of that special place. I would say no to any proposal that sacrifices this beautiful place in order to allow commercial developments that only benefit a few developers. Keep Holland Lake as it is now and into the future. No to developments that enrich a few at the expense of the rest of us here in Montana.
