First name: Tom

Last name: Read

Organization:

Title:

Comments: This proposed project will destroy the atmosphere as well as the heritage of its location. It is another project by and for the elite from everywhere else. Another Big Sky type operation. It will not benefit in any way the rank and file Montana resident. I see that one at least of the developers is from Park City, UT. Next thing is they will be applying for a permit for a ski lodge and chair lifts. Swan Valley has been discovered obviously, but this is an opportunity to keep its integrity intact by denying projects such as this one. This is just another grab by wealthy out of state developers whose only desire is more wealth. Say no and keep them out. There is no coming back if you allow this. Take a look around, there are very few places left in NW Montana without swarms of people. There is nothing special left. Yes I am a Montana native for nearly 72 years, and I am 5th generation. There is little recognizable left.
