Comments: The approval of this project would hurt Montanans access to this space and permanently alter the intrinsic value of Holland lake. This project only benefits a handful of people and would diminish the future potential of recreation and enjoyment of the public. This is not in line with Montana values or the desires of the public who enjoy this place. Please do not allow this development to go through, or we could risk turning our beautiful natural spaces into commercialized amusement parks in which only the wealthy can enjoy.
