Title:

Comments: I lived in the Swan Valley for 6 years and drove to Bigfork to work 5 days a week. The people driving the hwy. would usually stop if they hit a deer and make sure it was dead. Now we have more traffic and seldom does anyone stop. More traffic will mean more deer gone. I always believed the First Service was here for the public and the wildlife. I now know they are here for themselves. Shame on them. This project is just a way for them to make money and drastically change lives for the locals.
